## ABOUT THE COURSE

### **The importance of ESG in Public Reporting**

Presented by the SAMESG Committee

The programme aims to provide an overview of why environmental, social and governance (ESG) considerations are so important to the minerals industry from the perspectives of mining companies, investors, and external stakeholders.

Attendees will engage in discussions on key questions including:

- What is the global importance of ESG?
- What do investors think about ESG - do they even care?
- What does South African legislation say about ESG?
- How has the SAMCODES responded to the increased global interest in ESG?
- What do the JSE and SAMCODES expect of Public Reports prepared by mining companies?
